

LOOKING AT YOU

DIGITAL PRIVACY KIT

Looking at You is an immersive techno-noir opera confronting the issue of privacy in our digitized society. The global architecture of the Internet is a double-edged sword. On the one hand, it facilitates access to knowledge, economic growth, and freedom of expression. On the other, it erodes our right to individual privacy and creates novel cyber-challenges to the security of personal information. Through *Looking at You*, the intent of our creators and technologist-collaborators is to question how the loss of privacy could transform us as a global culture and confronts the audience with the fact that their personal information is available to anyone who cares to search for it.

As part of this project, we have created an online digital privacy kit with a list of resources to learn more about privacy (and its many threats) in our digital societies.
